AH: Environmental Filing  
Docket # FD 36284

Dear Mr. Wayland,

My main concern is the environment. We are already extracting more fossil fuels w/o regard to the environmental effects on our air, water and communities in the Basin.

This railway on the cost there of should be funnelled into alternative forms of energy. This railway is a total waste of taxpayers money. Fossil fuels may always be needed to provide our ~~energy~~ <sup>energy</sup> needs but we have enough extraction in Utah already

Sincerely  
B Gardner
